ProMedUSA Professional Ozonated Water Solutions

Why use Ozonated Water?

ProMedUSA's Professional Ozonated Water Solutions provide a steady stream of powerful Ozonated Water with up to 2PPM of dissolved Ozone.

1. Ozonated Water is 3,0000 times more powerful than Chlorine, yet the MSDS of Ozone Water is 0.0.0.0 (the same as tap water)
2. Ozonated Water is safe and absolutely harmless for Humans, Pets, and Plants. It is so safe, you can drink it.
3. Ozonated Water Cleans, Sanitises and Deodorises almost any surface in seconds
4. Quickly clean, sanitise and deodorise Toilets, Bin Centres, Floors, Walls, Food Processing Equipment, Schools, Hospitals, Clinics
5. Ozonated Water kills up to 99.999% of Viruses (including COVID-19, Coronavirus, and Norovirus), Germs and Bacteria including E.coli, Salmonella and Listeria
6. Clean and sanitise foods including seafood, meats, poultry, fruits and vegetables – extending shelf life and killing food born pathogens
7. Ozonated Water is 100% GREEN and SUSTAINABLE. When discharged down the drain it reverts back instantly into plain tap water.

ProMedUSA SG-OzPAK

ProMedUSA SG-OzVEST

Portable, Battery Operated, Ozonated Water Jet Spray System

The OzPAK and OzVest contain a rechargeable battery providing up to 12 continuous Hours of Ozonated Water containing up to 2PPM of dissolved ozone.

PROVEN - VERIFIED RESULTS

Men's Toilets

LOCATION	READINGS					
	ODOUR READING			BACTERIA SWAB TEST RESULTS		
	Cosmos XP-329 Odour Meter			SystemSure Plus ATP Monitor		
	BEFORE	AFTER	PERCENT CHANGE	BEFORE	AFTER	PERCENT CHANGE
LITTLE INDIA NEL MRT STATION GENTS TOILET	586	478	DOWN 19%	5272	20	DOWN 99.9%
BUKIT TIMAH FOOD CENTRE GENTS TOILET	496	345	DOWN 31%	1143	29	DOWN 97%
BERSEH FOOD CENTRE GENTS TOILET	472	338	DOWN 28%	621	100	DOWN 84%

Test Procedure: The smell in the men's toilet at these 3 test sites was first measured for odour reading using the standard Cosmos Model XP-329 Odour Meter.

Before treatment, the urinals were swabbed and tested with the hospital grade SystemSure Plus ATP meter the relative bacterial count was measured as a baseline..

The urinals were then washed down quickly with the Ozonated Water from the SG-OZPak and the readings were taken again.

The results: Odours immediately reduced with a single washing from 19 to 31% (repeated washing will further reduce the odours).

The bacteria count was reduced by 84-99% to a level that would be acceptable by the AVA for serving food on (100 counts or less).
