

Four Seasons Resort

Hualalai, Hawaii

One of the world's newest and most luxurious resorts is the new Four Seasons Resort Hualalai on the Kona Coast of the Big Island of Hawaii.

Surrounded by white-sand beaches and black lava landscapes the resort is nestled on the blue oceanfront on Hawaii's North Kona Coast.

It is owned by MSD Ventures – which is Michael Dell's family investment group. They rigorously tested numerous air purification technologies, and selected AtmosAir's Bipolar Ionization system to install in all guest rooms and facilities at the resort.

AtmosAir's bi-polar ionisation air purification system was installed to help the Four Seasons Hualalai comply with the Four Season's "Lead with Care" enhanced health and safety program and their Covid-19 advisory board with a consulting agreement with Johns Hopkins Medicine International (also an AtmosAir client).
