

## STOP MASKING TOILET ODOURS – KILL THEM!

Toilet odours, particularly urine smells, can be both bothersome and tough to eliminate. Mists and sprays often just mask the odours and, in many cases, aren't effective enough when the smells are too strong.

Additionally, these spray dispensers require frequent refills, and their monthly rental costs can quickly add up. A smarter solution is to install our **PurAire MiniPro-1 Bipolar Ioniser**, which eliminates odours on contact. Don't just mask them—get rid of them and stop those monthly payments.

Save money and have a fresh clean smelling toilet.
